

21ST TO 23RD JUNE 2018

Coimbra – Portugal

The MPMM 2018 (Maintenance, Performance, Measurement and Management – 2018) corresponds to a one more International Conference, that will be held in Coimbra.

MPMM 2018 invites all researchers and professionals in the field of maintenance to participate, namely presenting communications, and sharing their experience and results with the other colleagues.

Nowadays maintenance is having a new emphasis, because it is the strategic tools to increase the company's competitiveness. Simultaneously, today's technologies, both in innovation and price, permit to implement new solutions to reach those objectives.

The increasing capacity to store data, that can support the enormous amount of data generated from equipment sensors, associated to the facility to transmit data, using IoT, IoS, among other possibilities, has opened a new world for maintenance activity.

The many standards that supports the several maintenance activities, added to the new ones related to Asset Management open new approaches to the maintenance activity that must be discussed and shared the best case studies.

It is a new Era of challenge for the maintenance activity, and MPMM 2018 Conference wants to be a strategic Forum to discuss them.
